- Operating Systems: Windows, Basic Linux
- Tool's Technologies: Visual studio code, Eclipse, AWS Management Console
- Design Tools: Canva,
- **Version Control:** Git , GitHub .
- OTHER: Tools AI, Base Networking, System Admin

LANGUAGES

• English, Marathi, Hindi

PROJECTS

Final-year College | BHANDUP (E)

Nov '24 - Feb '25

Train Ticket Reservation System:

A secure web-based application for booking train tickets online, checking train schedules, seat availability, fares, and train timings. Users can search trains between two stations, book tickets, view booking history, and manage their profiles. The system includes separate access for Admins to add, update, or remove trains, and for Users to register, login, and book tickets.

Magic Bus India Foundation | Thane (W)

Jun '25 - Jul '25

AI Summary Generated Application:

A cloud-based web application that allows users to upload PDF or TXT notes, which are then summarized using Amazon Bedrock's LLaMA 3 model. The system is built entirely on AWS Serverless Architecture, using services like Lambda, API Gateway, S3, DynamoDB, and SNS for automation, storage, and notifications. Users receive a unique ID and optional email alert to access their summaries.

Certification

AWS Certified Cloud Practitioner | Amazon Web Service

Aug '25 - Aug '28

AWS Certified - CLF-CO2

TOP SKILLS COVERED:

Amazon web service, Cloud Platform, AWS Cloud
